Dikshant Jangra

Software engineer. I build production software end to end: AI agents, backends and the apps on top. Open to SDE and AI engineering internships from January 2027.

dikshantjangra.me hello@dikshantjangra.me github.com/DikshantJangra linkedin.com/in/dikshantjangra Haryana, India

1ST PLACE, MCP CHALLENGE ACROSS 3 CAMPUSES · HUNDREDS OF ORDERS A DAY IN PRODUCTION · 24,000-PRODUCT CATALOG RUN ON ~70 MB RAM · 2 OPEN-SOURCE AGENT TOOLS ON NPM

EXPERIENCE

Team lead, SDE intern · AgroEdge Apr 2025-Aug 2025

Led the team building an agri-tech platform before launch, remote from Bengaluru · React, TypeScript, Tailwind CSS

PROJECTS

myRxSetu Live

Pharmacy management software for India: POS, stock, GST and an online store in one system. Counter POS, owner dashboard, admin console, storefront and a desktop shell on one Hono API. Each pharmacy gets its own libSQL database, with batch and expiry tracking, a GST tax engine, Razorpay, WhatsApp, and fast medicine search on Typesense. Self-hosted on Coolify.

Next.js, Hono, Drizzle, libSQL, BullMQ, Typesense, Razorpay

NewtonClaw Award · Open source

Took 1st place at the Newton School MCP Challenge across 3 campuses and won a year of Claude Pro. A local-first AI agent for students. One agent loop, built as ports and adapters, serves both a terminal CLI and a Telegram bot, calls tools over MCP and runs on OpenAI, Claude, Gemini or fully offline on Ollama. Ships with npx newtonclaw.

MCP, TypeScript, Telegraf, OpenAI / Ollama, Chrome extension

BlazeEats Live

The full tech stack behind a food brand. Hundreds of people order on it every day. Storefront, kitchen, rider and HQ apps on one multi-tenant Postgres backend. Tenant isolation with row-level security, money in integer paise, GST invoicing, Razorpay webhooks with reconciliation, and an outbox for durable jobs.

Next.js 16, React 19, Hono, Drizzle, PostgreSQL, Tailwind v4, Razorpay

KR Stationers Client · Live

Took a 24,000-SKU retail catalog online. A self-hosted enrichment pipeline that fills in product data and images for the whole catalog without paid APIs, in about 70 MB of RAM.

FastAPI, Python, Medusa, Next.js, Cloudflare

ResolvHome Live

Home-services booking platform with an operator console. Customer app and admin panel in one Turborepo, sharing a design system and an API client generated from the backend's OpenAPI spec, so the two can't drift apart.

Next.js, React 19, Tailwind v4, TanStack Query, Zustand

Also: BlazeBill: Offline-first restaurant billing and POS with open pricing; HopeRxPharma: Pharmacy software: stock by batch and expiry, GST billing, suppliers and prescriptions; India SaaS Starter: A boilerplate with Razorpay, WhatsApp OTP and GST invoices built in; BLUE GATE AI: Smart-money-concepts indicator and Expert Advisor for MetaTrader 5.

EDUCATION

B.Tech, Computer Science & AI 2024-2028

Newton School of Technology, Rishihood University

AWARDS

1st place — Newton School MCP Challenge Apr 2026

NewtonClaw · 1st of 3 winners, 3 campuses · won a year of Claude Pro (worth $200)

SKILLS

Languages: TypeScript, Python, SQL
AI agents and MCP: MCP, Claude / OpenAI / Gemini, Ollama, Workers AI
Backends that handle money and stock: PostgreSQL, Hono / FastAPI, Drizzle, Razorpay
Product engineering, end to end: Next.js / React, React Native, Cloudflare, Playwright
